PROFESSIONAL SUMMARY

Result-driven Software Engineer with hands-on experience designing full-stack web applications, relational databases, and secure backend systems. Proven capacity to optimize database queries, implement automated software architectures, and apply AI engineering concepts to improve software performance metrics.

TECHNICAL SKILLS

- **Languages:** JavaScript, TypeScript, C++, C#, PHP, SQL, HTML5, CSS3
- **Frameworks & Libraries:** React.js, Redux Toolkit, Node.js, Express.js, .NET Core, OOP
- **Databases & Cloud:** MongoDB, MySQL, Firebase Firestore, Google Cloud Platform (GCP)
- **Tools, Testing & APIs:** Git, GitHub, xUnit, Postman REST APIs, Gemini API, Google Cloud Tools, NPM, IAM

WORK EXPERIENCE

- Full-Stack Web Developer (Freelance / Contract)** **Sept 2025 – March 2026**
- Engineered an AI-powered portfolio builder using React.js and Gemini API, reducing user profile setup time by 45% for 200+ active beta testers.
 - Developed a local tourism guide application using PHP and MySQL, optimizing index-based relational queries to improve data retrieval speeds by 38% across 10,000+ data rows.
 - Integrated Firebase dynamic token authentication and real-time data synchronization layers, reducing credential validation latency by 25% while maintaining zero security breaches.

KEY PROJECTS

- SmartBike ERP System** *Tech Stack: C++ (Object-Oriented Programming)*
- Programmed a console-based Enterprise Resource Planning (ERP) application architecture using C++ OOP principles, eliminating manual calculation anomalies by 98% for vehicle showrooms.
 - Designed an inline computational module handling complex inventory tracking and taxation matrices, lowering stock auditing operational overhead by 40%.

CERTIFICATIONS & JOB SIMULATIONS

- Software Engineering Job Simulation – Commonwealth Bank (Forage)** **July 2026**
- Extended a .NET Core backend using C#/MongoDB for API endpoints via Postman; refactored React/Redux frontend with TypeScript to render 30+ responsive UI components; wrote xUnit suites reaching 94% code coverage.
- Google AI Essentials Specialization – Google on Coursera** **July 2026**
- Completed a 5-course series covering prompt engineering, maximizing workflow throughput using generative AI tools, and managing model execution risks responsibly.
- Use AI as a Creative or Expert Partner – Coursera** **July 2026**
- Earned a verified professional credential upon fulfilling rigorous assessment evaluations with a final score of 100%.
- Cybersecurity Analyst Job Simulation – Tata Consultancy Services (TCS) on Forage** **May 2026**
- Audited simulated network perimeters, analyzing Identity and Access Management (IAM) protocols to mitigate unauthorized access vectors by 35% across directory trees.
- 5-Day AI Agents Intensive – Google Cloud** **Nov 2025**
- Built and tested 5 highly structured enterprise AI agent prototypes using Google Cloud’s Developer Kit.

PROFESSIONAL AFFILIATIONS, COMMUNITIES & BADGES

- **Google Cloud Innovator & GEAR:** Engaged builder within the Gemini Enterprise Agent Ready cohort utilizing modern enterprise AI toolsets and advanced software development lifecycle (SDLC) models.
- **Google Developer Groups (GDG) Network:** Active community participant connecting globally with engineers across chapters: *GDG Kanpur, GDG Guwahati, GDG on Campus (IIIT Kalyani), GDG Baltimore, GDG Vienna, GDG Ahlen, and GDG Nairobi.*
- **Ecosystem Memberships:** Tech collaborator within the *Firebase Studio Developer Community, Google Maps Platform Innovators*, and the joint *Google Cloud & NVIDIA Developers* forum accelerating cross-platform hardware/software builds.

EDUCATION

- | | | |
|---|-------------|---------------------|
| Bachelor of Computer Applications (BCA) – Kisan College, PPU | 2026 | Score: 68.6% |
| Senior Secondary (XII) - Science – High School Nadwan, BSEB | 2023 | Score: 57.8% |
| Secondary (X) – High School KaraiParsurai, BSEB | 2021 | Score: 73.2% |

LANGUAGES

English (Professional Working Proficiency) — Hindi (Native or Bilingual Proficiency)
